

BEAM

CENTRAL VACUUM SYSTEMS

Fresh Thinking.

Fresh Thinking. Built into your home.

Can the way you clean the house give your life peace? Health? Joy? It can if you take a fresh approach to cleaning. It can if you have a Beam®.

With the new generation of Beam Central Vacuums nothing matches a Beam's cleaning power. With up to five times more power than an ordinary upright or canister vacuum a Beam removes 100% of contacted dirt and dust.

It's the most powerful, quietest, the only central vacuum system clinically proven to reduce allergy symptoms. It's cleaner, healthier living built-in. It's fresh thinking built-in. It's Beam.

Everything's Clean.

With each Beam® Power Team™ you get the proper tools to clean anywhere dirt can hide. Carpet. Hardwoods. Tile. Stone. Stairs. Vents. Nooks. Crannies. Up high. Down under. And everywhere in between. For a total house clean.

The Beam® Q Power Team™

The quietest electric power brush available, with three levels of height adjustment providing Beam's highest level of carpet cleaning effectiveness. The Beam® Q Power Team™ also comes with On-Board tools that include a dusting brush and crevice tool that attach to the ultra handle, and an additional upholstery brush and 14" floor brush.

Nothing matches a Beam's cleaning power except perhaps its ingenuity. We refined every inch of the Beam Central Vacuum Systems from adding an exclusive patented Quiet Pak™ sound insulation system that makes Beam the quietest central vacuum system in the industry to the automatic self-cleaning design, featuring self-cleaning vacuum filters from the makers of GORE-TEX® fabric giving us the only central vacuum to clinically reduce allergy symptoms.

By adding a KickSweep® automatic dustpan in the kitchen or mudroom you get the ultimate cleaning convenience. In addition, Beam offers specialized attachments for cleaning vehicles, blinds, ceiling fans and even your pets.

Professional installation or do it yourself!

Your Beam® dealer can install a Beam Central Vacuum System in your new or existing home in just hours — with no mess, no disturbance to your walls. With Beam's exclusive self-cleaning vacuum filters from the inventors of GORE-TEX® fabric, there's no outside venting required. Or you can install it yourself!

- Tubing installed through interior walls, attic, basement and crawlspaces connects vacuum inlets to the power unit/collection canister.
- Each strategically located inlet lets you vacuum approximately 700-800 square feet.
- A Beam system can be installed in virtually any home, new or old, usually in just hours.

Lifetime limited warranty

The Beam power unit body and filter are warranted for as long as you own your home. Motor and electrical components are warranted for ten years on the Beam Serenity® QS and seven years on the Beam. Hoses, attachments and accessories are warranted for three years except for consumables such as light bulbs and belts. Ask your Beam dealer for complete warranty details.

90-day money-back guarantee

If you, the original purchaser, are not satisfied with the performance of your new Beam system within the first 90 days from the date of purchase, your dealer will remove the power unit and refund your money. The 90-day money-back guarantee applies to new and complete installations only.
